Optimising your Competences for Success in Digital Transformation

Prof. Dr. Gudrun Frank & Verena Beckhusen

exprobico - The experts for career, training and competence
probico mini-check

- probico-check - is context-specific and largely individualised for specific requirements
- multi-dimensionally cross-linked with its questions and tasks and always linked with multiple competences
- probico-check - is built up from a source of more than one hundred competences in the exprobico system
- probico-check generated from approximately five thousand questions, tasks and scenarios
- conclusions about competences can be drawn from the kind of questions and the results (dynamic exprobico - database)
- database is continuously validated
